This book aims at helping people with basic knowledge of Graphology to understand the advanced concepts. It will also give an insight into how the powerful science of Signature Analysis plays a pivotal role in the in depth reading of the personality.

Preface

After the grand success of Volume 1 of Handwriting – Your Unique Font, It gives me immense pleasure to introduce Volume 2 to my readers. I thank my mentors and all my students and clients who directly or indirectly empowered me not only as a professional graphotherapist but also as a person.

Taking you beyond the basics of the science of Graphology, let's understand the concepts which are related very closely and deeply to our actual life. This book will help you understand your emotional, social and psychological needs and will also help you feel your presence and connect with the people around. Vol – 2 will also pose a simple yet straight forward question that will educate you and motivate you to think about the synchronization between your *THOUGHTS – WORDS, WORDS- ACTIONS, THOUGHTS – ACTIONS* and an overall harmony between *THOUGHTS – WORDS- ACTIONS*. I am sure that on reading this book it will take you closure to a meaning full SWOT analysis of your inner self.

I as a practicing Handwriting Analyst face this dilemma of cursive and print writing from the parents, teachers and students. The contents here will certainly be able to clear the cobwebs in the minds of the people who without serious thought make their pupil or child shift from a cursive pattern to a print pattern and vice versa. My experience over the years tells me that people are not really aware about the science behind the pen strokes, these books are my own small contribution towards creating awareness and a scientific understanding of the power of our pen strokes. I appeal to all who have ever been connected with children's handwriting directly, professionally or otherwise to please initiate the process of understanding this science before drawing any conclusions what so ever based on Handwritings of kids in school and family.

By now you already know that handwriting is indeed Brain writing. I sincerely request you to analyze your own thoughts using the powerful tool of graphology.

Thank you,

Pradeep S. Kirpalani

f

The specialty of this letter is that it comprises of all the three zones.

The letter f throws light on the planning and execution ability of a person.

Types:

1. These people gather information from past references and put it into reality thereby producing fantastic results. They are known for their brilliance. Such a person attracts lot of social recognition in the form of awards and rewards. He will be well known for his planning , however won't be very good at executing himself .He would be very good at heading a team which will help him bring his plans into reality.

2. This is a person who would not give the due importance to the past references. In fact he would just go by what he has understood based on his intelligence. He misses on the intellectual cushion created by the masters. He also attracts name fame and recognition for his work and commands a team to perform with him.

3. This writer does not travel the distance gathering proper information, as a result the information that he has gathered remains incomplete. He is intelligent, however his intellectual laziness makes him weaker as compared to the preceding two types of f. He intends to lead a group, however is not really cut out to be a leader. In the whole bargain he would make some name for himself.

4. This person is known for his planning and execution ability. He is very good at organizing a group or managing a situation, can be good at crisis management. He has an objective view point and can lead by example. He has a professional approach. He is known for his masculine qualities.

5. This f reveals fluidity of thought. It makes a person a good conversationalist, writer, orator, etc. They are very good at performing in a team. They are known for good planning however they are slow at execution as they would need support from their family and team. They are known for strong relations with females. Their strength and motivation comes from important females in their life. Good family life is important for their professional success. It is also known as the feminine f. They can be very good motivators. Can have a strong bonding with their maternal relations.

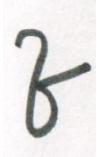

6. Here the writer has good planning and execution, however during execution he can't perform the entire task independently so he needs the support of his family. In this process he gets the support of the family with lot of pain involved. This stress dilutes the overall quality of his success. They are persistent in completing their task.

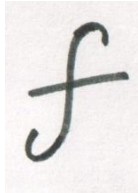

7. This f indicates good planning. During execution this person needs support from the family which creates lot of stress for him. The triangle in the lower part of f here indicates very high level stress within the family during execution. This shows that even though he completes his task the qualitative factor is lost in the process due to these complications.

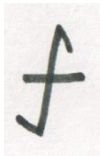

8. This hook on the left side of the f shows a mind full of conspiracies and shrewdness. His execution is all about executing his so called nasty plans.

9. This type of f with an incomplete pattern in the upper zone and lower zone reveals a poor attempt at planning and execution. This person very seldom completes what he starts. Yet he attracts some social recognition which might be due to his family name.

10. This also is incomplete planning and execution with a strong element of stress involved which is seen in the angular formation in the upper and lower zone. The social recognition is seen due to the family name.

11. The lack of a loop in the upper zone here shows a vacuum in the intellectual area. These blemishes are because he somewhere had to leave his studies midway due to challenges on the domestic front. Such writers deep within are envious of people who are highly qualified. The execution zone however is complete which makes them suitable for roles and careers that demand more of execution and less of planning.

Signatures

Signature is called our public image. In graphology the pen strokes in the script is an indicator of who we really are at the subconscious level and the signature is a projection of our personality. Because the signature is a projection for the public at large hence **it is called the Public Image**. Signature comprises of our Name, middle name and surname.

Hari Mahesh Sadu

1. *The Initial of our First name is called the self Image.*

In the above example the **H** of Hari stands for the self Image.

This positioning and handling of the self image lays emphasis on the value that we attach with our principles in life.

2. The '**ari**' of Hari stands for the importance that Hari gives to his likes and dislikes. Here the presence, absence and pattern of ari throws light on how much importance he gives to his likes and dislikes.

3. The Initial of the Middle name for example **M** of Mahesh is called the Male Image.

It highlights the importance the writer gives at a sub conscious and spiritual level to men in his life.

4. The remainder of the middle name Mahesh that is **ashesh** in this case highlights the importance given to the likes and dislikes of our male image.

Hi,

It fills me with great excitement to share this amazing experience we had in Dubai when Mr. Pradeep S. Kirpalani did such an accurate personality analysis of me and my wife merely through our handwriting. We were truly surprised to see that handwriting can reveal so much about a person within no time. I suggest each and every person must experience this to believe it.
